The Old City District and the Vision2026 Steering Committee held a public open house on June $23^{\text {rd }}$ at the Arch Street Meeting House. The purpose of the open house was to share research, existing conditions, and initial impressions with the broader community... and get feedback and input.

The boards from that open house are posted here, so that anybody not able to join us on the $23^{\text {rd }}$ can stay up to speed. It's a work in progress, but we want to keep you informed along the way.

Thank you for your interest in the future of Old City.

## oLp vision aiv 2026

## Working Toward a Plan

The Old City District, in its role as a special services district and Registered Community Organization, is embarking on the development of a neighborhood master plan. Work began in May and planning will conclude in the fall, when the implementation process will kickoff.

Elements of the plan will include:

A broad vision<br>for highest and best uses in sub districts and corridors within Old City<br>A "civic checklist" for considering proposed developments as the RCO<br>Recommended IU|ICP YPAIII, street life, and<br>\section*{connectivity improvements}<br>\section*{Site-specific approaches for}<br>rehabilitation/infill of critical development sites

## Tell Us What You think!

Using the scroll號 with your ideas, challenges and aspirations.

If you haven't already, please take the omline survey over 400 already have!

After this open house, we will continue collecting resonses from an online survey, and will be convening focus groups of retailers and arts organizations before developing preliminary recommendations.
www.oldcitydistrict.org/vision2026

Materials will be posted here as they're developed throughout the planning process.

Old City is a worldwide tourist magnet, a destination for thousands of workers, a hub of creativity, a regional dining and entertainment scene, and an attractive residential choice. Independent-minded people can come together to tackle some persistent neighborhood challenges, nurture continued growth, and maintain a high quality of life with facts, vision, and mutual understanding and compromise.

## Today: Looking in the Mirror

Before making plans, we're getting a lay of the land and want to share our impressions with you, and get your feedback. We've arranged the existing conditions into four basic sections

## Public Space + Connectivity <br> Zoning + Overlay Regulations <br> Market Inventory + Study <br> Architectural Character

Thesis: Old City has morphed from being seamlessly connected to its nearby neighbors to being isolated from the rest of the City, in a way not equally experienced by other reviving areas. Significant effort must be paid to encourage people to cross the psychological divides to and from Old City that have been created over the decades.

Independence Mall and wide office buildings without active ground floors make 2nd and 3rd Streets seem far away from Independence Hall and the East Market area about to undergo major reinvestment.

North

The Benjamin Franklin Bridge and to a greater degree, Interstate 95 and its ramps, form a pedesrian barrier between Old City and Northern Liberties. Philadelphia 2035 includes recommendations to repopulate the Callowhill area.

South

Urban renewal of the mid-20th Century transformed Society Hill from a neighborhood with a commercial waterfront to a residential enclave. The Towers isolate Old City from the 2nd Street Headhouse, South Street, and Queen Village.
$\qquad$

## 

Thesis: Despite having high-quality and iconic parks at its edges, Old City lacks truly lovable public spaces at its heart that benefit all district residents, visitors, and businesses.

If security concerns can be met, the space beneith the Benjamin Franklin Bridge can serve as a flexible space for events or parking, bringing together Old City with neighborhood to the north.

Elfreth's Alley is hidden from 2nd Street by two bare lots. Converting one or both of them into pocket parks could serve as neighborhood amenity, and a more dignified approach to a Philadelphia treasure.

Sidewalks shape the pedestrian experience. The vast majority of sidewalk dining in Old City is found on and south of Market Street. Would such activity be welcome in other parts of Old City?
 and Strawberry can be enlivened with lighting or public art and be transformed into public spaces on evenings and weekends without disrupting transit on larger City Avenues.

Christ Church Park is an incomplete space, but with potential to be Old City 's great public square, as beloved as any other.
 historic buildings and retail. The east end opens up to Christ Church and its Park, and transforms into the N3rd Market every week. Build on this!

$\qquad$

## 

## FACTS + TRENDS TO CONSIDER

Daily traffic on N. 3rd Street has dropped from 6,141 cars in 2004 to 4,970 in 2014 (DVRPC) In 2005, traffic on the New Jersey Turnpike was expected to grow by $68 \%$ by 2032; as of 2014, however, traffic volume has dropped by $10 \%$ (Philadephia Inquirer)

Between 1999 and 2012, subway, trolley, and bus ridership on SEPTA grew 28\% (Philadelphia motu) Bus Route 57 carries over 11,000 people per day; Market-Frankford subway carries over 180,000 Nearly 75\% of Center City employees get to work without a car (Center City District) Philadelphia has the highest rate of bicycle commuting of any large city in America (BcGP) Local businesses saw retail sales increase 49\% after construction of Manhattan's 9th Avenue protected bike lane, compared to an average of $3 \%$ on other streets in the borough (NyCDOT)

Philadelphia's Indego bikeshare system expected 30,000 rides, but exceded expectations with over 50,000 rides in its first month of operations (Philadelphia MOTU)

Thesis: To accommodate shifting mobility preferences and avoid negative impacts of development, it is important to embrace and promote car-free options for residents, workers, and visitors.

Car Share Spaces: The required minimum number of off-street parking spaces for a residential use may be reduced by four spaces for each automobile parking space reserved as an autoshare parking space, up to a maximum of a $40 \%$ reduction in the required minimum number of parking spaces in any one surface parking lot or parking garage. The calculation of maximum surface parking spaces shall not be affected by this reduction.
Bike Parking Spaces: For every five Class 1 bicycle parking spaces that are provided on a lot, the number of required off- street automobile parking spaces may be reduced by one space, up to a maximum reduction of $10 \%$ of the required automobile parking spaces.
